

DOE Webinar March 2, 2017

Energy Performance Contracting: Tools for Success

The U.S. Department of Energy (DOE) Federal Energy Management Program (FEMP) will present a new First Thursday Update webinar, *Energy Performance Contracting: Tools for Success*, from 1:30 to 2:30 pm ET on March 2, 2017.

The First Thursday Update will introduce cutting-edge web-based tools and user-friendly software that make matching project financing options, including Energy Savings Performance Contracts (ESPCs), Utility Energy Service Contracts (UESCs), and Renewable Energy Procurement (REP), with energy and water conservation opportunities easier and more efficient. In collaboration with other federal agencies, FEMP makes open-access tools available at no charge, including templates, software, calculators, relational data sets, and databases for powerful applications and results. Learn how FEMP's tools can help teams implement projects that minimize staff effort and maximize quality.

The instructors for this First Thursday Update are Kurmit Rockwell, Dept. of Energy FEMP, Thomas Hattery, Oak Ridge National Laboratory, Elizabeth Stewart, Lawrence Berkeley National Laboratory, and Phil Coleman, Lawrence Berkley National Laboratory.

Webinar registrants will learn to:

- Select energy service companies effectively using ESCO Selector
- Efficiently manage and track project data using eProject Builder
- Calculate rate escalation accurately using Energy Escalation Rate Calculator

The 60-minute training is free of charge, but advanced registration is required to obtain an Internet URL for the presentation. Registration for the broadcast will close on March 1, 2017.

For more information and to register, visit the FEMP Training course website.

For other free First Thursday training courses offered by FEMP, visit the FEMP Training website.
